

St. Paul Early Center Extended Day Program

Curriculum Goals

The extended day program is available to children who are currently enrolled in St. Paul Early Learning Center's 4 year old class or pre-k class. This program extends the day to 1 p.m.

Throughout each week, children will participate in music and movement activities, art, math, science, sensory exploration, and group games.

With a lunch brought from home, children will learn how to open packages, eat in a timely manner, and experience success with lunchtime at school. In addition, children will get a feel for a longer day which is essential in preparing for kindergarten. Specific information can be obtained from the Early Learning Center Director. Please call Judy Staudigel at 513-931-9062.
